P4H Pico Projector

User Guide

Caution!

WARNING: Please use this product as instructed. Misuse may cause injury or death.

DO NOT use while driving

DO NOT expose to water or wet surfaces. Electric shock may occur

DO NOT expose the LED to your eyes or the eyes of others

DO NOT block or restrict airflow from ventilation holes as this may cause the projector to overheat

Keep the projector, battery, or charger away from any heat sources

Caution for Battery Use

- Do not pierce or puncture the battery with sharp objects
- Do not heat the product or expose it to high temperature.
- Do not wet it or place it in any liquid

Caution for Earphone (Earplug) Use

- Prolonged use at high volume may impair your hearing.
- High volume during walking or driving may cause distractions and result in injury or death

USB Adapter

AV Cable

*Under various circumstances, the actual accessories may be different from those shown in the pictures above.

Powering ON the projector

1. Connect the power cord to the P4X.
2. Connect the wall plug into the wall power source.
3. Press POWER button and hold for 2-3 seconds to switch on or switch off the power
 - The LED turns red while charging.
 - The LED turns green when charging is finished.
 - 4 hours of charge time is required to reach a full charge.

Powering OFF the projector

1. Press and hold the power button for 3 seconds.
2. The optical engine should power off and the fan should stop spinning.
 - Note. Pressing the power button on the remote puts the projector in standby mode. It will NOT turn off the projector.

Note: The P4X Projector battery does not charge when it is in operation.

Focus Adjustment / Throw Distance

Focus Adjustment

1. Spin the focus wheel left or right until the image becomes clear.
2. The recommended focus distance for this projector is 12" to infinity.

Throw Distance Chart

Distance inch (")	Diagonal Inch (")
12	6.3
18	9.5
24	12.6
30	15.8
36	18.9
74	38.9
84	44.2
96	50.5

Throw Ratio 1.9

Connecting to a Computer via VGA

Step 1:

Connect the large end of the

VGA Cord

to your computer's

VGA Adapter

Step 2:

Connect the small end of the

VGA Cord

to your P4X's

VGA Adapter

Step 3:

In the Main Menu

Select "VGA" icon

Connecting to a Computer Cont.

Step 4:

Enabling VGA or HDMI output on your Computer – To enable VGA or HDMI output on your computer most computers require “turning on” the video output feature. Each computer is different. Please consult your owner’s manual for instructions to enable VGA or HDMI output. Below are standard instructions for a Windows XP computer – not all systems are the same.

Step 5:

Press function & “F5” to instruct the computer to enable multiple displays.

You can also press Windows+P to toggle through display settings.

*NOTE: different operating systems may differ

Step 6:

1. Right click on computer desktop and select “Properties”
2. Display Properties window will pop up
3. Click on the “Settings” Tab
4. If a secondary monitor is grayed out, click on it and check “Extend my Windows Desktop onto this monitor”
5. If the image is blurry or the text is not legible, adjust the screen resolution. We recommend 800x600 or 1024x768.

Connecting to a Computer via HDMI

- Color Temperature
- Aspect Ratio
- PC Setup
- Backlight

Sound

- Sound Mode

Time

- Clock
- Sleep timer
- Off Time

Option

- OSD Language
- Restore Factory Default
- Blending
- OSD Duration

Troubleshooting

IMAGE IS BLURRED

Possible Causes	Solution
The Projector is not in focus	Adjust the focus with the focus adjustment dial until the image comes into focus
The Projector is offset from plane / angle of operation	Move the projector so that it is both 180 degrees and on an even plane with the screen.

No Sync, No Signal

1. Be sure to setup the computer to enable a video signal output. On some laptops this is done by pressing and holding Function F5 key. If using the P4X as an external monitor on Windows based systems, this can be done by selecting "extend my desktop to this monitor". The P4X projector accepts up to 1280x800 resolution. Depending on the video driver different resolutions may need to be selected for proper output.

Technical Details

Troubleshooting

THE PROJECTOR DOES NOT TURN ON

Possible Causes	Solution
There is no power	Check to ensure the power outlet or battery source is good. check the power adapter to ensure a proper connection with the wall outlet as well as the projector. Confirm that the unit is charged and has enough power
The power button was not held long enough	To power on the projector, the power button needs to be depressed for a full 3 seconds. try holding the power button until the optical engine turns on

NO PICTURE / FILE NOT SUPPORTED

Possible Causes	Solution
The video source is not properly connected or selected	Check the video source signal to ensure that it is properly connected. Select the current input source by choosing the input desired from the main menu
Incorrect file extension / Video is encoded with incorrect codec	Please refer to "Specifications" page to see which file types and codex are supported. Verify that the file was encoded properly.
